SUMMARY

Recent Computer Science graduate with a strong foundation in software development and data analysis. Proficient in Python, Java, and SQL, with experience in developing web applications through internships and academic projects.

EDUCATION

Bachelor of Computer Applications

Poornima University

08/2022 – present

Jaipur, India

PROFESSIONAL EXPERIENCE

Java Developer Intern

Ambuja Foundation

05/2024 – present

Jaipur, India

- Solved 100+ programming problems and build up the the logical thinking ability.
- Learned JDBC to connect database to the application.
- Run 100+ sql queries on the database to alter,update and delete data.
- Designed a portfolio website using HTML,CSS and javascript.
- Worked in team to solve complex problems with my colleagues and helped each others.

Data Science Intern

Celebal Technologies

05/2024 – present

Jaipur, India

- Learned how to analyze and visualize data using different libraries.
- Developed different types of ML models for predictions.
- Applied various statistical techniques to derive deep insights from data.

PROJECTS

Plant Disease Detection System

- Developed using deep learning libraries like tensorflow and keras.
- Preprocessed data for better model training also performed Data Augmentation.
- Implemented on API using Flask framework.
- Achieved 95% accuracy in predicting plant diseases.

Facial Expression Recognition System

- Developed for recognise the expression of face based on their reactions.
- Used PyTorch deep learning library for developing it.
- Utilized CNNs within the PyTorch framework to achieve high accuracy in facial recognition.

Personal Assistant

- Developed this project in my first year of college to enhance my skills.
- Used pytsx3 and other python libraries to create this project.
